

CAREER PROFILE

I hold a PhD in Physics and completed a Master's in Data Science, bringing over three years of experience in Python coding, AI, and machine learning. My expertise encompasses modeling and training AI models, writing efficient Python scripts, designing and deploying robust data pipelines, conducting innovative research, and creating advanced visualizations that convert complex data into actionable insights. I am also proficient in SQL, Tableau, and Power BI, building comprehensive dashboards that support data-driven decision-making.

TECHNICAL SKILLS

- Proficient in AI model evaluation and prompt engineering within RLHF workflows, assessing truthfulness, instructions, and adaptability, while refining prompts to enhance model performance using platforms like Feather and Hubstaff
- Specialized in Python programming, including data analysis, automation, and machine learning using libraries such as Pandas, NumPy, and scikit-learn.
- Proficient in SQL for querying, modeling, and managing complex relational databases like PostgreSQL and MySQL.
- Skilled in creating interactive dashboards and visualizations using Tableau, Power BI, and Matplotlib.
- Experienced with GitHub for version control, Docker for containerization, and Snowflake for cloud data warehousing.
- Adept at leveraging tools like Visual Studio Code, Google Analytics, and Excel for data-driven solutions and reporting.

EDUCATION

Master of Data Science

Charles Darwin University, Sydney, Australia

Mar 2023 - Nov 2024

PhD in Physics

CY Cergy Paris University, Cergy, France

Oct 2018 - Sep 2022

Master of Theoretical Physics

CY Cergy Paris University, Cergy, France

Sep 2016 - Jun 2018

EXPERIENCE

AI Data Trainer & Evaluator

Jul 2024 – Present

- Completed 50+ hours of AI model evaluation on projects like Colosseum V2 and Hard Colosseum V2, ensuring high-quality AI responses by assessing correctness, instruction following, hallucination detection, formatting, and comprehensiveness using Feather for task execution and Hubstaff for time tracking.
- Reviewed, rated, and ranked AI-generated responses, identifying areas for improvement and refining model outputs to enhance user experience.
- Developed and iterated on prompts to test AI performance, challenging responses to uncover failure points and improve model adaptability.
- Provided detailed feedback and justifications to guide AI model training, ensuring alignment with project-specific guidelines and human expectations.

Data Analyst

Jul 2024 – Present

The Bitrates, Sydney, New South Wales, Australia

- Designed and implemented Python scripts for data cleaning, preprocessing, and analysis, improving data pipeline efficiency by 30%.
- Developed machine learning models in Python for predictive analytics, enabling data-driven business decisions.
- Leveraged AI techniques to automate repetitive tasks, reducing manual effort and improving productivity.
- Built dynamic dashboards and visualizations using Python libraries like Matplotlib and Seaborn to communicate insights effectively.
- Integrated Google Analytics data with Python for advanced analysis, enhancing customer behavior insights.

Data Analyst

Mar 2024 – Jun 2024

iBuild Building Solutions, Victoria, Australia

- Automated data extraction and structuring of population datasets using Python, improving data accuracy and team collaboration.
- Analyzed customer support data with Python to optimize response times and enhance operational efficiency.
- Developed Python-based solutions to generate actionable insights, meeting strict deadlines for strategic decision-making.

- Designed Python scripts to create dynamic reports and dashboards, significantly improving customer satisfaction and decision-making processes.

Software engineer and Analyst

Property Console, Sydney, Australia

Jun 2023 - Nov 2023

- Built Python scripts to track key metrics, ensuring 99% data accuracy and improving data integrity and operational efficiency.
- Collaborated with the development team to enhance analytics capabilities, using Python to improve data processing speed by 25%.
- Leveraged Python for data preprocessing and analysis, producing Tableau dashboards that improved decision-making.
- Supported cross-functional teams with Python-driven insights, enabling customer-focused initiatives.

Research Assistant

CY Cergy Paris University, Cergy-Pontoise, France

Oct 2018 - Sep 2022

- Utilized advanced Python programming for computational modeling and solving complex research problems.
- Developed Python-based workflows to manage and analyze large datasets across multiple research projects.
- Presented Python-enabled research findings at international conferences, demonstrating technical expertise and communication skills.

Lecturer and Course Facilitator

CY Cergy Paris University, Cergy-Pontoise, France

Sep 2019 - Jun 2022

- Led engaging physics tutorials for master's students, enhancing understanding and promoting teamwork.
- Designed course materials, assignments, and exams, strengthening the learning experience.
- Mentored students on projects, collaborated with faculty, and fostered student engagement.

Research Intern

CY Cergy Paris University, Cergy-Pontoise, France

Feb 2018 - Jun 2018

- Developed proficiency in Python programming by researching the effect of magnetic fields on 2D materials.
- Managed and analysed complex data sets, improving their accuracy and reliability.
- Used dashboard using Power BI to present research findings and participated in weekly reviews, improving collaboration and research skills.
