

Maheshwor Tiwari

Sydney, NSW, Australia | 0414032507 | maheshwortiwari.com.np@gmail.com | [LinkedIn](#)

CAREER HIGHLIGHTS

Senior Data Analyst with 5 years' experience in data analysis and AI engineering, working with tech and construction industries to deliver data-driven insights and solutions.

- Improved forecasting accuracy by 25% using PostgreSQL and Power BI for client databases, enhancing decision-making processes
- Developed AI models and training prompts, increasing model reliability by 15% and capabilities by 20%
- Automated data extraction and dashboard creation, reducing reporting time by 30% and improving decision-making

Skills: *Python* | *Power BI* | *SQL* | *Tableau* | *Data Analysis* | *Report Generation* | *Dashboard Creation*

PROFESSIONAL EXPERIENCE

The Bitrates Hurstville, NSW, Australia
Data Analyst & AI Engineer (Contract) July 2024 - Present

- Analyzed client website databases using PostgreSQL and Power BI, improving forecasting accuracy by 25%
- Built CV Agent (Flutter/Dart frontend, Python backend) with multi-LLM orchestration serving 500+ users
- Implemented real-time ATS optimization algorithms analyzing keywords, structure, and readability for 500+ resumes

Outlier.ai Remote
AI Data Trainer & Evaluator (Freelance) July 2024 - Present

- Evaluated and improved AI model responses for accuracy, quality, and alignment with expectations, enhancing model reliability by 15%
- Developed training prompts to identify AI performance gaps, improving model capabilities by 20%
- Provided detailed feedback on AI training projects, contributing to reliable AI systems

iBuild Building Solutions Victoria, Australia
Data Analyst Mar. 2024 - June 2024

- Automated data extraction for population datasets using Python, improving accuracy by 20%
- Built Power BI dashboards reducing client reporting time by 30% and improving decision-making
- Optimized customer support response times through data analysis, achieving 15% efficiency gain

Property Console Sydney, Australia
Software Engineer and Analyst June 2023 - Nov. 2023

- Built Python scripts to track key metrics, ensuring 99% data accuracy and improved data integrity
- Collaborated with development teams to enhance analytics, improving processing speed by 25%
- Preprocessed and analyzed large datasets, producing Tableau dashboards for stakeholder reporting

EDUCATION

Charles Darwin University Sydney, Australia
Master of Data Science 2023 – 2024

CY Cergy Paris University Cergy-Pontoise, France
PhD in Physics 2018 – 2022

SKILLS

- Technical Skills:** Python, Power BI, SQL, Tableau
- Soft Skills:** Communication, Problem Solving, Teamwork, Analytical
- Other Skills:** Data Analysis, Report Generation, Dashboard Creation, Collaborative, Results-Driven

PROJECTS

CV Agent – AI-Powered Resume Builder | *Flutter, Python, Multi-LLM, APIs* [Link](#)

- Developed full-stack AI application with 500+ active users; real-time ATS scoring and optimization
- Implemented multi-model fallback system ensuring 99% uptime and reliable content generation
- Created role-specific templates with quantified achievement suggestions and skills gap analysis

YOLOv8n Corrosion Detection Optimization | *PyTorch, Computer Vision, Edge AI* [Link](#)

- Optimized YOLOv8n model for real-time corrosion detection on drones and edge devices

- Achieved 11.39% model size reduction through L1-norm structured pruning
- Improved inference speed by 39.34%, making model deployable on resource-constrained devices

Heart Attack Risk Prediction System | *Python, scikit-learn, Deep Learning*

[Link](#)

- Built ensemble ML system for cardiovascular risk prediction achieving 92% accuracy
- Implemented logistic regression, random forests, and deep learning with class imbalance handling
- Created clear visualizations for medical stakeholders and model interpretability
